OUR BODY TURNS
NATURALLY AROUND
THIS IMAGINARY

ROTATION LINE

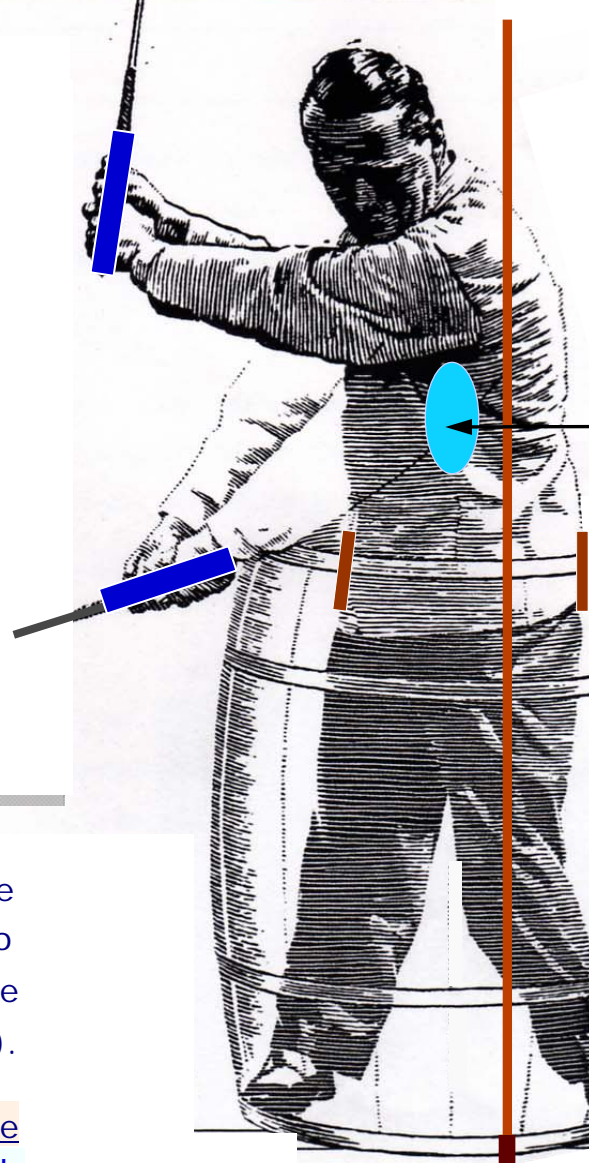

by **PERCY BOOMER**

Imagine you are standing in a barrel hip high and big enough to be free of each hip but close enough fit to allow NO to-and-fro movement.

Learn to feel the pivot from the hips ...the shoulders moving in response to the pivot...the arms moving in response to shoulders.

Your wrists free to respond to the momentum and weight of the club head.

Imaginary

RL

SYT™ Golf Method directs the golfer's primary visual focus to an imaginary line beneath the ball called Rotational Line (RL).

It provides a natural pivot plane for the golfer to align his hands clubface and body. His mind and body use this imaginary line to turn and rotate around in a very powerful and balanced fashion.
